

# Procedure for setting a Beovision & AVANT 7 DVD To Region Free

The following is the procedure for setting a Beovision 7 & AVANT DVD to be "Region Free"

NOTE: It is important to disconnect the DVB-T module before making the product region free.

## **BEO4 Procedure**

1. Switch on the BeoVision 7 or AVANT in DVD mode with no disc in the loader
2. Close DVD loader
3. Using the Special Beo4 remote, PRESS button **2**
4. Press **LIST** on the Beo4 remote until **REG2** is in the display, then PRESS **OK** (wait 1 sec between command presses below)
5. PRESS **2 2 2 2 2 2**
6. PRESS **0 0**
7. PRESS **5**
8. PRESS **2**
9. PRESS **5 5**
10. PRESS **LIST** on the Beo4 until "**SHIFT**"
11. PRESS **0**

## **BEO5/6 Procedure**

The Beo5/6 will previously had the special "[Region Free Commands](#)" XML file added to the configuration which will provide all the required commands on the screen

1. Switch on the BeoVision 7 or AVANT in DVD mode with no disc in the loader
2. Close DVD loader
3. In the Zone screen press "**Region Free Commands**", then PRESS screen button **2**
4. PRESS **REG2** in the screen display (wait 1 sec between command presses below)
5. PRESS **2 2 2 2 2 2**
6. PRESS **0 0**
7. PRESS **5**
8. PRESS **2**
9. PRESS **5 5**
10. PRESS "**SHIFT**" on the screen
11. PRESS **0**

When the first IR-code is transmitted there will appear an X on the top-left side of the television screen. After 2 sec, this X will disappear. (On newer BV7, the X will not appear).

If the X appears for a second time, start all over again

Now the product is programmed to region code "0"

Do not use region code settings in the service menu

Always insert different region discs to test
